

## 9.0-Megapixel Image Quality

The exceptional image quality of Fujifilm's high-performance 9.0-megapixel Super CCD HR image sensor produces sharper, more brilliant, higher resolution pictures, suitable for big-screen display or printing at enlarged sizes.

## Real Photo Technology for Beautiful Photos

Fujifilm's RP (Real Photo) Processor complements the performance of the unique 9.0-megapixel Super CCD HR to deliver crisp, sharp images with minimal noise. The FinePix A900 also features Intelligent Flash Technology, ensuring attractive, natural-looking pictures without the washed-out look of conventional flash photos.

## Quality Enhanced by Cropping

With 9.0-megapixel image quality, photos taken with the FinePix A900 can be cropped and enlarged for added visual impact, creating impressive images that maintain all the vivid color and detail of the scene.

## Mode Dial & On-screen Shooting Guide

A newly incorporated mode dial permits effortless selection of convenient shooting modes and functions. The bright 2.5-inch LCD monitor displays an easy-to-read graphical user interface that explains and confirms camera settings at a glance, letting you shoot with ease and confidence.

## SPECIFICATIONS

### DIGITAL CAMERA FinePix A900

|  |   |
|--|---|
| Number of effective pixels <sup>*1</sup> | 9.03 million pixels   |
| CCD sensor                               | 1/ 1.6-inch Super CCD HR  |
| Storage media                            | Internal memory (Approx. 10MB), xD-Picture Card™ (16MB - 2GB), SD memory card <sup>*2</sup>   |
| File format                              | Still image: JPEG (Exif Ver. 2.2 <sup>*3</sup> )/Movie: AVI (Motion JPEG)<br>[Design rule for Camera File system compliant/DPOF-compatible]   |
| Number of recorded pixels                | Still image: 3488x2616(9M) / 3696x2464(3.2) / 2592x1944 (5M) / 2048 x1536 / 1600 x1200 / 640x480  |
| Lens                                     | Fujinon 4× Optical zoom lens, F2.9 - F6.3   |

The number of images and recording time will vary slightly depending on the type of subject.

\*1 Number of effective pixels:  
The number of pixels on the image sensor which receive input light through the optical lens, and which are effectively reflected in the final output data of the still image.

\*2 Please see the Fujifilm website to check memory card compatibility.

\*3 Exif 2.2 is a newly revised digital camera file format that contains a variety of shooting information for optimal printing.

\*4 Manganese dry, nickel-cadmium and lithium AA batteries cannot be used with this product.

4x Optical Zoom

2.5-inch LCD

xD/SD Compatible Slot

Preserve the Beauty of the Moment with  
9.0-Megapixel Image Quality and 4x Optical Zoom

# 9.0-Megapixels + 4x Zoom Performance in an Easy to Use Pocket Camera

DIGITAL CAMERA  
**FinePix A900**

## Blur-free Photos

With the ability to boost sensitivity to a maximum ISO 800, the FinePix A900 lets you freeze fast action without unsightly subject blur.

Conventional digital camera

FinePix A900

## High Sensitivity + Intelligent Flash

Intelligent Flash combines with high sensitivity (max ISO 800) to ensure attractive flash photos with optimum exposure of both background detail and foreground subject, making it easy to preserve atmosphere and mood in various lighting conditions.

Standard flash

High-sensitivity + Intelligent Flash

## 4x Optical Zoom + Digital Zoom

The FinePix A900 combines a 4x optical zoom with a max 7.6x digital zoom. A digital zoom mode is included as one of the convenient shooting modes on the mode dial. In this mode, the high-performance Super CCD ensures sharp, clear images at 12x (4x optical + 3x digital) zoom ratio.

Wide angle

4x optical zoom

4x optical zoom + 3x digital zoom

## Versatile Shooting Modes & Scene Positions

In addition to shooting modes selected via the convenient mode dial, the FinePix A900 offers versatile scene positions that take the guesswork out of shooting, giving you great photos even in tricky situations.

Baby

Sport

Natural Light

## xD/SD Compatible Slot

The memory card slot is compatible with both xD-Picture Card and SD memory cards, enabling SD card users to record pictures on their existing cards.

## Additional Features

### Movie Recording with Sound

Enjoy the immediacy of QVGA movie recording at 30fps quality with monaural sound.

### IrSimple™

The new global-standard IrSimple™ high-speed infrared communications protocol makes sharing and exchanging pictures amazingly simple. Picture data can be transferred between IrSimple-equipped digital cameras, portable printers and print ordering terminals effortlessly, at lightning speeds.

- Internal memory (approx. 10MB)
- Video output for TV monitor
- Multi-language LCD monitor

- PictBridge compatible
- USB digital interface
